

coronavirus

Coronavirus doesn't have to be scary!
Wear a mask and wash your hands often!

Coronavirus is a little bug
that can make people sick!

Sometimes, if someone gets sick
with coronavirus, they have to go to
the doctor to get better!

The coronavirus bug can sometimes bounce
between people, especially
when they cough or sneeze!

Good news!

If you wash your hands
with water and soap for
20 seconds, you can keep
the coronavirus bug away
from you and your family.

By not standing too close and
wearing masks, we can keep the coronavirus
bug from landing on many people!

Remember that everything is going to be okay
because this coronavirus bug will go
away someday.

All bugs
do!

Spend time with your family and
do fun activities to keep from
worrying about the coronavirus bug.
